- REST APIs, Nodejs, GraphQL
- Strapi, Wordpress
- Google App Engine, CI/CD
- Jest, React Testing Library, Vitest
- Agile Methodology, Scrum

### LANGUAGES

- Tamil & English

### PROFILE

As a Passionate and Dedicated **Front-end Developer** with **2.5 years** of experience, I leverage **Next.js, React.js, TypeScript**, and **Tailwind CSS** to craft scalable and performant web applications. With a strong foundation in web development, built over **4 years** of diverse experience in various roles, including **JavaScript Intern, Freelancer**, and **Coding Mentor**, I bring a unique perspective to my work. With strong communication skills and a collaborative mindset, I drive team success and deliver high-quality solutions. I'm passionate about continuous learning, personal growth, and expanding my skill set into full-stack development.

### WORK EXPERIENCE

#### FrontEnd Developer | FULL Creative 2022 - PRESENT

##### Technical Expertise:

- Currently migrating the branding website projects from Java to **Next.js 14, ReactJS 18**, and **TypeScript** for building fast, scalable, and maintainable websites.
- Utilizing **Tailwind CSS** for efficient and consistent styling and creating reusable components based on **Atomic Design** principles.
- Maintaining the Next.js projects in **Monorepo** with shareable functionalities, **ESLint**, and **Prettier** configuration for streamlined development.
- Used build tools like **Webpack** and **Gulp** for previous projects to optimize and automate development workflows. Currently exploring **Vite** as well.
- For Deployment, we have been using **Vercel** for Next.js applications and **Google App Engine** for Java applications with **CI/CD** Pipeline. One of our branding websites is built using **Markdown (.md)** files.
- Recently, started working with **Strapi (Headless CMS)**, alongside **Node.js, REST APIs**, and **GraphQL**.
- Built minimal test cases with **React Testing Library, Vitest**, and **Jest**, and continued refining my skills in React concepts such as **Hooks, Context API, Redux** for state management, etc.
- Collaborated with the **back-end team** to analyze the feasibility of revamping **signup pages** for branding websites, implementing **native ads** to a brand, and delivering a comprehensive analysis with well-documented findings.

##### Achievements:

- Served as **Scrum Master** for a few months. I proposed a new documentation system to handle sprint items, which received praise from multiple teams. This documentation reduced the time spent on sprint rituals by almost **50%**.
- Addressed a critical legal issue** for one of our brands, removing partner mentions from web pages and preventing potential legal action from partners.
- Organized** weekly learning sessions, where I helped team members collaborate and share their learnings, and get feedback on presentation and communication skills.

#### Coding Mentor | CodingHero 2021 - 2022

At CodingHero, I had the rewarding role of a coding mentor, where I dedicated my time to teaching children the fundamentals of programming. My focus was on two primary areas: introducing young learners to programming through Scratch and advancing their skills with React using CodeSandbox.

#### Freelancer | Upwork 2020 - 2021

As a freelancer on Upwork, I worked on various small projects across different domains, sharpening my skills, expanding my knowledge, and building a diverse portfolio.

#### JavaScript Intern | FULL Creative 2019 - 2020

I started my development journey as a JavaScript Intern at Full Creative, where I built a strong foundation in web technologies and launched my software development career.
